CAREER OBJECTIVE

Motivated high school student working to become a mechanical engineer. Over the past few years, worked on various projects broadening my engineering experience. Eager to work hard while learning new concepts and helping you and your team in any way I can.

EXPERIENCE

Robo Hub

2024-2024

Intern

- Taught younger kids engineering skills
- Helped students create drones, Lego robots, 3d models, and animations
- Developed a system to create time-lapses of different 3d prints

12589 Pioneer Robotics

2021-2025

Build Leader

- 2024 New England Finalist
- 2023 MTI participant (Top 40 teams worldwide)
- 2023 MA States Winner
- 2021 MA State Finalist
- FLL mentor (Founder of 2 teams)

Investment Club

2021-2025

President

- Wharton Global Youth Investor (Top 200 out of ~1300)
- Stevens Trading Day Investor (44th of 711)

Model UN

2021-2025

Leader

- Participated and traveled for Brown University Simulation Of United Nations & Model United Nations of the University of Chicago

Saint Johns High School Tennis

2021-2025

Varsity

SKILLS

CAD: SolidWorks, Fusion 360, Onshape & AutoCad

Design/Analysis: Simulation (FEA), Rendering, Tolerance Analysis & Engineering Drawings

Manufacturing: CNC, Laser Cutting, Power/Hand Tools, 3D Printing, Soldering & Wiring

Programming: Python, Web (React & HTML), Java & IoT

PROJECTS

Auto Tracking Camera

Developed a camera attachment that tracks and moves to detect and follow faces using Machine Learning and computer vision.

Home Automation system

Installed a home automation system that connects over 150 smart devices across multiple ecosystems to a single Raspberry Pi server.

Built & modified a 3D printer

Installed Ender 3 v2, a Cr Touch, Direct Drive extrusion, & an additional z-axis to the 3D printer

Created an invisible mouse

Developed a program that uses the camera to detect the position of a hand and uses it to move the cursor.
